

ALEXANDER R. RIVERA

NABCEP CERTIFIED LEAD SOLAR TECHNICIAN

Austin, TX 78745 (512) 555-0194 a.rivera.solar@example.com
linkedin.com/in/alex-rivera-pv

NABCEP PVIP Certified

OSHA 30 Safety

Licensed Electrician

Professional Profile: Resourceful and safety-focused Lead Solar Installation Technician with over 6 years of hands-on experience in residential, commercial, and energy storage system (ESS) projects. Proven expertise in field team supervision, main service panel upgrades (MPU), complex string and microinverter wiring, system commissioning, and strict adherence to NEC Article 690 codes. Maintained a 100% zero-incident safety record across 3.5+ MW of installed solar power.

PROFESSIONAL EXPERIENCE

Lead Solar Field Technician | Apex Clean Energy Solutions

2022 – Present | Austin, TX

- Direct daily field operations for a 6-member installation crew across commercial (up to 500 kW) and residential rooftop solar systems.
- Perform AC/DC electrical wiring, grid interconnections, main panel tie-ins, and installation of Enphase IQ8 microinverters and SolarEdge Synergy systems.
- Conduct comprehensive post-install commissioning: IV curve tracing, megohmmeter insulation testing, string voltage verification, and FLIR thermal imaging.
- Enforce strict OSHA fall protection standards and site safety protocols, achieving 1,000+ incident-free working days.
- Coordinate directly with local municipal inspectors and utility reps (Oncor, Austin Energy) to secure rapid Permission to Operate (PTO).

Solar PV Installer & Maintenance Tech | SunRay Electric & Renewables

2019 – 2022 | San Antonio, TX

- Installed structural roof mounting systems (IronRidge, Unirac, QuickMount PV) across composite shingle, tile, and metal roof surfaces with zero leaks.
- Bent and routed EMT/PVC conduit from roof junction boxes to ground-level inverters, disconnect switches, and generation meters.
- Integrated home battery energy storage systems (Tesla Powerwall 2/+, Enphase Encharge) including critical load sub-panel wiring.
- Performed corrective maintenance, rapid shutdown troubleshooting, microinverter swaps, and communications gateway provisioning.

Electrical Apprentice & Solar Assistant | Lone Star Power Systems

2018 – 2019 | San Marcos, TX

- Assisted Journeyman Electricians with wire pulling, grounding grid bonding, structural staging, and equipment mounting.
- Managed material staging, job-site hazard assessments, and tool maintenance.

FEATURED TECHNICAL PROJECTS

⚡ 450 kW Commercial Rooftop PV Installation — Austin Logistics Center

Led crew on flat TPO roof installation featuring ballasted racking, 1,100+ panels, dual 100kW SolarEdge inverters, and high-voltage grid interconnection. Completed 4 days ahead of schedule.

🔋 Residential Microgrid & Dual Powerwall System — Hill Country Estate

Installed 18.5 kW PV array paired with 27 kWh Tesla Powerwall battery storage, automatic transfer switch, and smart load management. Fully operational off-grid capabilities.

CORE COMPETENCIES

PV System Design AC/DC Wiring
NEC Code (Art. 690) Conduit Bending
Roof Mount Racking
Battery Storage (ESS)
SolarEdge & Enphase
Thermal Imaging IV Curve Tracing
Panel Upgrades (MPU)
Grid Interconnection Fall Protection
Crew Leadership

CERTIFICATIONS

NABCEP PV Installation Professional (PVIP)

North American Board of Certified Energy Practitioners (#PVIP-0921-884)

OSHA 30-Hour Construction Safety

U.S. Dept. of Labor

Licensed Journeyman Electrician

Texas Dept. of Licensing & Regulation

Tesla Powerwall Certified Installer

Tesla Energy Academy

Enphase Certified Field Specialist

Enphase Energy University

CPR / First Aid / AED Certified

American Red Cross

EDUCATION

A.A.S. Renewable Energy Technology

Texas State Technical College

Graduated: 2018 | GPA: 3.8

High School Diploma

Austin High School

Graduated: 2016

TOOLS & EQUIPMENT

- Fluke 1587 FC Insulation Tester
- FLIR Thermal Camera & Analysis
- Seaward Solar Utility Tester
- Torque Wrench & Calibrated Tools
- Aerial Lifts & Scaffold Safety
