Professional Profile

Digital transformation strategist who bridges technical execution, commercial growth, and humancentric innovation. With a foundational background in medicine and a proven track record across health tech, education, HR, and enterprise B2B sales, I specialize in identifying hidden friction points and creating lasting solutions to complex challenges. As a commercially minded generalist with deep technical proficiency, I take ownership of the entire lifecycle: planning, prototyping, designing, delivering, and measuring outcomes.

Core Competencies: Full-Cycle B2B Sales, Account Management, AI Strategy & Rapid Prototyping (NLP/LLMs), Cross-Functional Leadership, CRM Management (Salesforce), Market Intelligence, Consultative Selling, Agile/PRINCE2 Delivery.

Work Experience

July 2024 Present

Train Garden– AI Transformation Delivery Lead

- End-to-End Lifecycle Ownership: Spearheaded AI strategy and discovery phases, identifying and validating high-impact transformation opportunities across the sustainability, legal, and HR sectors.
- Rapid Prototyping & Technical Execution: Owned the technical and design lifecycle, rapidly prototyping, building, and delivering functional AI and NLP solutions (Python, JavaScript) optimized for human-centric UI/UX.
- Commercial Growth & Pipeline Development: Drove business development by building B2B sales pipelines, successfully bridging the gap between technical feasibility and enterprise adoption.
- Strategic Market Intelligence: Distilled complex market, competitor, and customer data to define key account metrics, translating analytics into actionable insights for C-suite leaders, founders, and government stakeholders.

April 2024 Present

Tegus by AlphaSense – Consultant

- Delivered strategic advisory and market intelligence to institutional investors and corporate entities, pinpointing commercial friction points and growth vectors in HealthTech, AI, and medical billing software.

April 2024 – August 2024

Outlier– AI Training expert

- Leveraged deep clinical and technical domain expertise to train, evaluate, and optimize complex LLMs in medicine, linguistics, and technical terminology.
- Assessed and ranked the factuality, relevance, and safety of AI-generated responses to ensure human-centric accuracy in clinical applications.

June 2022 – June 2024

Sirkka Health – Digital Health Transformation Lead

- Cross-Functional Management: Managed a high-value portfolio of 10+ digital health startup accounts, operating as the strategic bridge connecting clinical staff, IT developers, and commercial partners.
- Solution Delivery & B2B Sales: Managed solution delivery in collaboration with engineers, marketing, and finance teams while proactively driving B2B sales and business development initiatives to scale adoption.
- Corporate Strategy: Monitored the startup landscape to anticipate market shifts, integrating these insights into corporate strategy for organizational growth.
- Culture & System Optimization: Cultivated an innovative company culture by leading the recruitment, onboarding, and systemic integration of new teammates.

April 2018 – June 2022

Genwell Medical – Account Executive

- Managed the end-to-end processing of complex 20+ accounts
- Redesigned the account onboarding process, reducing turnaround time by 80% and accelerating the path to revenue realization
- Navigated regulatory requirements to ensure account compliance while identifying opportunities for digital process improvements

October 2020 – February 2022
